## ASX Announcement

17<sup>TH</sup> JANUARY 2019

### NEW PROSPECTING LICENCE GRANTED IN BOTSWANA

The Board of Six Sigma Metals Limited (“SI6” or “the Company”) is pleased advise that it has received notification from the Department of Mines in Botswana late in 2018 that an outstanding Prospecting Licence application has been granted. Official paperwork confirming the licence has now been received by the company.

The Prospecting Licence, PL389/2018, comprises 40km<sup>2</sup> and covers the same area of a licence (PL14/2003) previously held by the company in and around their existing tenure in the Limpopo Mobile Zone. The licence has been granted for an initial period of three years, ending on 30/09/2021.

PL389/2018 is prospective for base-metals and gold mineralisation and contains at least 3 historical prospects all showing potential to host nickel sulphide and/or base metal mineralisation. Historic exploration at these prospects shows ultramafic lithology at surface, prominent nickel, copper and cobalt soil anomalies and electro-magnetic (EM) responses indicative of possible sulphide mineralisation.

The Company will review all existing data from the licence and design an exploration program to test priority targets during the 2019 field season.
